The Rutgers University UCBS Program, funded by the National Institutes of Health, prepares biomedical scientists for a range of careers in **five professional tracks**: i) science and health policy; ii) business management; iii) intellectual property management; iv) clinical and regulatory sciences; and v) health and science data analysis. The program is designed to complement time spent outside of lab and to maintain research as the primary training focus, while offering programming to broaden trainee's perspectives, experiences and knowledge to facilitate pursuit of non-academic careers. Elements include core professional skills training, site visits to partnering companies, didactic courses relevant to the five career tracks, shadowing experiences and career placement support.
